

FOR IMMEDIATE RELEASE

CMD BIOSCIENCE APPOINTS VICTOR J. HRUBY, PhD TO IT'S SCIENTIFIC ADVISORY BOARD

ORANGE, Conn., March 31, 2010 -- CMD Bioscience, a CT based biotechnology company specializing in computer-aided peptide drug discovery, announced today the appointment of Victor Hruby, Ph.D. to its scientific advisory board.

Dr Hruby received his PhD from Cornell University and is Regents Professor Emeritus of Chemistry, Professor Emeritus of Biochemistry and Molecular Biophysics, Professor Emeritus, Arizona Research Laboratories, Professor Emeritus of Neuroscience, Professor Emeritus of Medical Pharmacology at the University of Arizona.

Dr Hruby's research focuses on the design, synthesis, and analysis of biologically active peptides and peptide mimetics, with a special emphasis on the hormones and neurotransmitters affecting human behavior. Dr. Hruby is a world-renowned expert in the fields of rational antihormone development, design and asymmetric synthesis of conformationally constrained amino acids, peptides and peptide mimetics, and in the use of NMR and other physical methods to examine peptide and peptidomimetic conformations.

"Dr. Hruby is an exceptional addition to the CMD Bioscience Scientific Advisory Board. As a world-renowned expert on peptides and peptidomimetics, Dr Hruby will allow us to further integrate computational and experimental peptide science in exciting ways. His involvement highlights the groundbreaking nature of our technology and adds a vitally important perspective to the company." said Dr. Joseph Audie, the CEO and cofounder of CMD Bioscience.

CMD Bioscience, a privately held company based in Orange, CT, is an innovative leader in the development and application of advanced computational methodologies, expediting time to market for our partner's peptide-based products. Serving the pharmaceutical and biotech industries through international partnerships, collaborations, technologies and products, CMD Bioscience is setting the standard for computational peptide discovery.
